

# Right Where We Left Off

New Found Glory

You can't get rid of me that easy, no  
Not without a fight, your cool  
And collective approach is appealing, yeah  
You've got it down just right

You should put a blindfold over my eyes  
And tape my mouth shut  
When every word I say might as well be  
Might as well be my last thought

No, I don't wanna make this an issue  
I just wanna pick back up  
Right where we left off  
So we don't get caught up again

No, I don't wanna make this an issue  
I just wanna pick back up  
Right where we left off  
So we don't get caught up again

You left me pictures just to tease me  
Or maybe out of spite  
You use your body to confuse me  
Your hips swing just right

How do I control myself around you?  
I need to be locked up  
When every word I say might as well be  
Might as well be my last one

No, I don't wanna make this an issue  
I just wanna pick back up  
Right where we left off  
So we don't get caught up again

No, I don't wanna make this an issue  
I just wanna pick back up  
Right where we left off  
So we don't get caught up again

You're a wolf in sheep's skin  
Teeth can tear me limb from limb  
Do you have the room to spare me  
In your heart of hearts?

I'm a wolf in sheep's skin  
Teeth can tear you limb from limb  
I don't have the room to spare you

No, I don't wanna make this an issue  
I just wanna pick back up  
Right where we left off  
So we don't get caught up again

No, I don't wanna make this an issue  
I just wanna pick back up  
Right where we left off

So we don't get caught up again

Pick back up

Right where we left off

So we don't get caught up again
