

# Trophy

New Found Glory

Remember when I spilled my drink  
On your white Vans, how embarrassing  
You've grinned at me so delicate  
I couldn't relax, in my own skin

Everything looks new  
All because of you  
Everything that hurt inside has bloomed  
You gotta know

I ran a race and came up empty  
Until I met you and now you're my trophy  
Hope I didn't objectify you  
Feel like a winner when I'm standing by you

Remember how we walked for miles  
Through cemeteries, then the sun went down  
We slow danced to the cricket sounds  
The symphonies and no one's around

Everything feels new  
All because of you  
Every rip and tear healed up inside  
I've come alive

I ran a race and came up empty  
Until I met you and now you're my trophy  
Hope I didn't objectify you  
Feel like a winner when I'm standing by you

Number one, you're my number one  
Number one, I'm your number one

Everything feels new  
All because of you  
Every rip and tear healed up inside  
I've come alive

I ran a race and came up empty  
Until I met you and now you're my trophy  
Hope I didn't objectify you  
Feel like a winner when I'm standing by you

I ran a race and came up empty  
Until I met you and now you're my trophy  
Hope I didn't objectify you  
Feel like a winner when I'm standing by you

Number one, you're my number one  
Number one, I'm your number one
