

## Hard Way

### New Model Army

Old and weathered these mountains  
Worn and rounded their shoulders  
Smooth under our soles  
Become hard like the stone  
I watch you steeling yourself  
Against the fear  
For there's always been something else  
That really drives you  
We have energy left to burn  
We still have it all to come  
There's a long list of things for us  
In the glowing morning  
For the lessons that we've learned  
Have all been learned in the hard way  
And soon they'll be nothing to deny  
The best things are good to touch but never to take hold of  
If we can forgive ourselves then we must forgive the others  
The seasons will always return when they're ready  
Like people will always come round when they're ready  
And the lessons that we've learned  
Have all been learned in the hard way  
And soon they'll be nothing to deny  
And the lessons that we've learned  
Have all been learned in the hard way  
And soon they'll be nothing to deny  
And you don't know how the healing works  
And you sure don't know how long it takes  
Spirit will always find a way  
Come back when you're ready  
Come back when you're ready  
When you're ready
