

Sunrise

New Model Army

We sang aloud into empty space - get ready 'cause here we come
Passing trucks lighting up your face - get ready 'cause here we
come

Through a night of a billion stars and hot coffee and the past
receding

And now the road snakes through the fields of mist and the dawn
is slowly breaking

Sunrise - will you remember the golden fire?

Everybody has a favourite road - National 7 into the great wide
open

It joins up all the points in time, the great loves and the los
t and broken

We watched the fireworks bloom across the sky, high above the c
rowds all cheering

We lay awake until the town grew quiet, just holding breath and
waiting for

Sunrise - will you remember, breaking East of Eden

Sometimes the world works out the way you want it

Sometimes you say the things that you meant to say

Sometimes the moments break clear and certain

Sometimes the things you fear just roll away

So back here with my favourite song - get ready 'cause here we
come

Straight ahead into the beautiful dawn - get ready 'cause here
it comes

Sunrise - will you remember - I will, I will...
