

Night Like This

New Rules

I've been sleeping in my car
Counting every star for you
I've been drinking til the dawn
Waking up in bars for you

Now I'm on my knees
Stumbling in the dark
And every time I breathe
It's tearing me apart

If only you could see my heart still bleeds for you

It's a Friday night without you
I'm acting like I'm alright with someone new
But nothing ever feels like
The way it did when I met you on a night like this

All the city lights without you
They don't even shine like they used to
Cause nothing ever feels like
The way it did when I met you on a night like this

They keep playing our song
But she don't sing along like you
She could be the one
I guess I'll never know
Cause I'm not over you

Now I'm on my knees
Stumbling in the dark
And every time I breathe
It's tearing me apart

If only you could see my heart still bleeds for you
Bleeds for you

It's a Friday night without you
I'm acting like I'm alright with someone new
But nothing ever feels like
The way it did when I met you on a night like this

All the city lights without you
They don't even shine like they used to
Cause nothing ever feels like
The way it did when I met you on a night like this

On a night
On a night
On a night like this
I close my eyes and I picture this
The wind in your hair and the stars in your eyes
Breaks my heart every time

It's a Friday night without you
I'm acting like I'm alright with someone new
But nothing ever feels like
The way it did when I met you on a night like this

All the city lights without you
They don't even shine like they used to
Cause nothing ever feels like
The way it did when I met you on a night like this

A night like this
A night like this
Oh I met you on a night like this
