

# Here Tonight

Newton Faulkner

Even the blind man feels the sun on his face  
And feels the rain coming down  
It's no secret that we're floating in space  
And that the world's spinning round

We may not be here forever  
But we are all here tonight  
Our only guidance through this lonely life is love  
Sweet love's only light

Keep turning the pages just like nothing has changed  
Still the oceans rise  
No not the hour and we know not the day  
Cannot stem the tide

We may not be here forever  
But we are all here tonight  
Our only guidance through this lonely life is love  
Sweet love's only light

So tell your loved ones that you're here to stay  
Until the stars burn out  
Every moment is a link in the chain  
All the matters now

We may not be here forever  
But we are all here tonight  
Our only guidance through this lonely life is love  
Sweet love's only light

(Even the blind man feels the sun on his face)  
Only light  
(And feels the rain coming down)  
Only light  
(It's no secret that we're floating in space)  
Only light  
(And that the world's spinning round)
