

## Atmosphere

Nic D

You said show me something good and I might stay  
I said there ain't much good about me and I don't want to make  
you wait, yeah

You burn fire stone tires  
As you speed off in the sunset  
Saying your heart's so tired  
You carry heart break in abundance, so you're  
Kicking up dust on that county road  
Speeds picking up that's just how you roll  
And I'm standing there in the cold  
In a cloud of dust like smoke

I know it's cold outside but the atmosphere is changing  
I know you're trying to hide but you can't stay here, baby  
I know it hurts inside and it feels like it might break us  
But when I see the light it feels like we might make it

Sometimes it's easier for me if I don't think about it  
And by sometimes I mean every time, that's just the way I take  
around it, yeah

You burn fire stone tires  
As you speed off in the sunset  
Saying your heart's so tired  
You carry heart break in abundance, so you're  
Kicking up dust on that county road  
Speeds picking up that's just how you roll  
And I'm standing there in the cold  
In a cloud of dust like smoke

I know it's cold outside but the atmosphere is changing  
I know you're trying to hide but you can't stay here, baby  
I know it hurts inside and it feels like it might break us  
But when I see the light it feels like we might make it
