

## December

Nic D

That was when you held my hand in the backseat of a Tundra  
And you said I could be your man until the summer  
And I'm not even sure what you meant, it felt like love but we  
were young  
We were young

It was December and cold that night  
You said you didn't remember at all that night  
You burn like an ember on the 4th of July  
Looking for an adventure as you fall from the sky

I got nothing planned, come through  
I think I'm the man for you  
I got nothing planned, come through  
I think I'm the man for you  
I got nothing planned, come through  
I think I'm the man for you  
I got nothing planned, come through  
I think I'm the man for you, you, you  
You, you

The doc said I need medicine 'cause I'm in my head again  
But little does he know, I'm happy as I ever been  
I gave you a pass, didn't care if it lasts  
I don't want no new bae, I don't want

That was when you held my hand in the backseat of a Tundra  
And you said I could be your man until the summer  
And I'm not even sure what you meant, it felt like love but we  
were young  
We were young

It was December and cold that night  
You said you didn't remember at all that night  
You burn like an ember on the 4th of July  
Looking for an adventure as you fall from the sky

I got nothing planned, come through  
I think I'm the man for you  
I got nothing planned, come through  
I think I'm the man for you  
I got nothing planned, come through  
I think I'm the man for you  
I got nothing planned, come through  
I think I'm the man for you, you, you
