

Serotonin

Nic D

Ayoley beats this go crazy
100

Hello pretty baby my name's I don't mean to bother you
I just thought you looked like somebody I started talking to
If I had a dollar for every time that I thought of you
I would be the richest man alive from just the thought of you

I like your face, a dose of serotonin
Sun kissed waves and babe your skin is golden
13 ways to test, I'm Danny Ocean
Your my 10 out of 10, never my 10 in roman

What's next I guess I'll keep all this in check
I'm not scar-less, I've fallen
For less on edge
My darling keep calling

Hello pretty baby my name's I don't mean to bother you
I just thought you looked like somebody I started talking to
If I had a dollar for every time that I thought about you
I would be the richest man alive from just the thought of you

I like your face, a dose of serotonin
Sun kissed waves and babe your skin is golden
13 ways to test, I'm Danny Ocean
You're my 10 out of 10, never my 10 in roman

Have a couple kids, some cute ones
Have a couple wins, some loses
Some losses, I'm dodging, detoxing all the stuff that I hate
Getting out of our own way
We've never been so good ok
Never jump for the pump fakes
Hallways a runway

Hear you laughing
So nostalgic
You look good babe
Buy the outfit
Said you love me
I'm about it
Said you love me
I'm about it

Everybody look good too
It's only god we look to
Keep it going we push through
Keep it going we, uh
I just hugged you tighter baby
That was muscle memory
Future looking brighter baby
Ever since you said to me

I like your face, a dose of serotonin
Sun kissed waves and babe your skin is golden
13 ways to test, I'm Danny Ocean

You're my 10 out of 10, never my 10 in roman
