

Song For The Summer

Nic D

Aye she needs a song for the summer
Spotlight lover
Giving out her number
She needs somebody to love her
She a third wheel
She a piggy back
But instead of calling back
I made a song for the summer

Song for the summer
It's always gone before you can break ties
You need a song for the summer
By your side when somebody hit your line
You need a song for the summer
And all this time all you needed to feel alive was
A song for the summer

Why don't you pick me up outside of my house?
I know what you was thinking
Let's get some pizza and bounce
I could use another reason to hop off the couch
Keep that mess to yourself
No negativity allowed
Wow, I got lil shawty who wants me to stay
I told her baby I want it but you gon' run anyway
The sun lasting longer that means the longer the day
If you fall in love the things fall into place

What do you mean?
Is this what it seems?
I got somebody who told me
Its all good, it 'll be okay

Song for the summer
It's always gone before you can break ties
You need a song for the summer
By your side when somebody hit your line
You need a song for the summer
And all this time all you needed to feel alive was
A song for the summer
Song for the summer

Would I take pink pictures in the sky
It ain't over, overanalyze
No take backs the of cost going live
No brake pads, I'm all in for the ride

Song for the summer
It's always gone before you can break ties
You need a song for the summer
By your side when somebody hit your line
You need a song for the summer
And all this time all you needed to feel alive was
A song for the summer
