

This Far

Nic D

Sixty thousand people followin' me on my Instagram
Diet Coke and Mentos, we bout to blow, let's get it man
Why this awkward? Is it real life? I got crickets in my hands
Mona Lisa, Canary Yellow, that's my Mood, we did it then

We made it this far, we can't stop now
Gotta thank God, I's lost and found
Don't need much to calm me down
Just need a little love when things get loud

Crazy the moment on
Prayers that we sent on
Every message within tension
Start to gain a little attention
Every beat, every session
Every loss, every lesson
Started becoming an obsession
Gettin' fed up with perfection
They don't want that
They just think that it's whatever either way
I just felt that, I just wrote that
Got some things I need to say
I approach that, that's a known fact
Boy don't mess with me today
Gotta own that, I was told that everything gon' be okay

We made it this far, we can't stop now
Gotta thank God, I's lost and found
Don't need much to calm me down
Just need a little love when things get loud

I told myself this can't be it
Let's keep it goin' I know we did
I told myself this can't be it
Let's keep it goin' I know we did
This can't be it
