

# Handprints

Nick Jonas

Took the service elevator  
Let us out on 8th  
My daughter and the doorman  
Got a secret handshake  
Going to the tavern  
A few blocks down the road  
We could get there faster if we took a car  
So we don't

Handprints on the moment  
I'm holding ya so damn tight  
If we could run it back, run it back  
You know I'd gladly take it twice

But I know, know in the back of my mind  
Winter's a season away  
And you hate the cold, so I'm asking the leaves if they'd kindly not change  
I know, know in the back of my mind  
Nothing is ever the same  
If I could take one single moment and make it stay still in one place  
If I could slow down time  
I'd slow down mine with you

Walk around the river  
Do it while we can  
'Cause it won't be too long now, too long  
'Til it's FaceTime "goodnight"s at 9 a.m.

Handprints on the moment  
Give me more time, more time, I'll spend it right  
If we could run it back, run it back  
You know I'd gladly take it twice

But I know, know in the back of my mind  
Winter's a season away  
And you hate the cold, so I'm asking the leaves if they'd kindly not change  
I know, know in the back of my mind  
Nothing is ever the same  
If I could take one single moment and make it stay still in one place  
If I could slow down time  
I'd slow down mine with you
