

Let's Stay In And Make Love

Nick Lowe

I don't really care
about tonight's affair
We don't have to go
The same crowd will be there
like they've been before
At the last three in a row
Now your waiting in the hall
and I'm on the stair
Looking at you from above
And I say darlin just for a change
Lets stay in and make love
Please don't get me wrong
I love to party long
with my special girl

But there some thing in life
more important
than a busy social world
You say softly darlin
your quiet tonight and your right
cause what I'm thinking of
Is take off your dress Lets stay in and make love
Lets take a break
Precious moments to steal
Lets forget the chattering crowd
and get down to what's really real.
Da da da da da da...

I'll put on something that will groove us
you may dim the light
And come to me darlin
Lets stay in and make love
Slip off those things and love me now
There's a feeling of love in here
And its you, sweet embraceable you
Just for a change
Lets stay in and make love
