

Remembering

Remembering

And I gon' help my family
And hold this in your harmony
Ya'll hit me with this melody
I'm calling for your help you see
And keeping us alive
Growing with the plants at night
Helping us survive
Knowing who we are inside
I recall my father
The one who I came after
Who shepherded my laughter
And washed me in the bathtub
Oh when I was a boy
He was devoted to my joy
When I was a boy
He was a lovely young dad in the corduroys
Now home again my friend again
I'm glad you're on the mend again
Remembering you're in [?]
[?] we have within again

Now this is how it is
And this is how it's always been
Now whether we forget
Or whether we keep remembering
Remembering
Remembering

Sent to me or lent to me
Or somebody say meant to be
Oh I believe in an energy
It's looking through my eyes you see
And listening through my ears
Oh what does it hear
Only self does it hear
and everything and everywhere
Now yes I am an energy
that's feeling through my touch you see
Then nothing is too much for me
I'm infinitely such you see
And honestly the same
After all our different names
[?] the same
What and what and warning again
Now yes you are an energy
That's feeding through your touch you see
Saying nothing is too much for me
I'm infinitely such you see

And this is how it is
And this is how it's always been
Now whether we forget
Or whether we keep remembering
Remembering
Remembering
