

Rodeo

Nico Vega

These summer nights are long
This feeling never felt so wrong
I know
We were both better off before
But
Now we both really want some more
And
These city lights are warm
So many people's lives are torn
I know
Ain't life this rodeo
I've been burned by the nasty glow
Woah

You better let me go
You better let me go
'Cause it's better for the both of us
Woah
I need to let you know
I need to let you know
Babe

Shoowap, shoowah
I'm gonna miss you
I'm gonna miss you when you're gone
Shoowap, shoowah
I'm gonna miss you
I'm gonna miss you when you're gone
Shoowap, shoowah
I'm gonna miss you
I'm gonna miss you when you're gone
Shoowap, shoowah
I'm gonna miss you
I'm gonna miss you when you're gone

I left a letter next to your bed
Don't wanna mess with your head
I know
That we both really want to stay
But
We both know it's better off this way
And
These summer nights are warm
When I toss and I dance some more
I know
Ain't life this rodeo
I've been burned by the nasty glow
Woah

You better let me go
You better let me go
'Cause it's better for the both of us
Woah
I need to let you know
I need to let you know
Babe

Shoowap, shoowah
I'm gonna miss you
I'm gonna miss you when you're gone
Shoowap, shoowah
I'm gonna miss you
I'm gonna miss you when you're gone
Shoowap, shoowah
I'm gonna miss you
I'm gonna miss you when you're gone
Shoowap, shoowah
I'm gonna miss you
I'm gonna miss you when you're gone

Maybe we can let it go, my love
Maybe can move on
Maybe we can let it go, my love
Maybe can move on
Maybe we can let it go, my love
Maybe can move on

Shoowap, shoowah
I'm gonna miss you
I'm gonna miss you when you're gone
Shoowap, shoowah
I'm gonna miss you
I'm gonna miss you when you're gone
Shoowap, shoowah
I'm gonna miss you
I'm gonna miss you when you're gone
Shoowap, shoowah
I'm gonna miss you
I'm gonna miss you when you're gone
Shoowap, shoowah
I'm gonna miss you
I'm gonna miss you when you're gone
Shoowap, shoowah
I'm gonna miss you
I'm gonna miss you when you're gone

(Shoowap, shoowah)
(Shoowap, shoowah)
