

When You Come Around

Nicolette Larson

Day after day hoping for a word from you
Only to find you've changed your mind
So while you're sleeping in the arms of another
I'm trying to forget your face
It's clear to me that you're gonna see

That when you come around
When you come down off the high
You'll wish you never passed my love by
When you come around
When you come down off the high
You'll wish you never let it slide

Night after night stirring in my sleep
My dreams keep coming back to you
So while I'm sleeping in the arms of another
A love's all right falls through
It's clear to me (You know it's clear to me)
That you're gonna see (You're gonna see that)

When you come around
When you come down off the high
You'll wish you never passed my love by
When you come around
When you come down off the high
You'll wish you never let it slide

All of us who
In the end
Cause love won't wait for fools
Who pretend nothing's wrong
After living alone so long

When you come around
You're gonna wish you never passed my love by
When you come around
You're gonna wish you never passed my love by (When you come around
When you come down off the high
You'll wish you never passed my love by
When you come around
When you come down off the high
You'll wish you never let it slide)
