

## Practice Makes Perfect

Nicotine Dolls

Look at me the same way you want it  
I know it's better than being haunted and lonely  
It may not be real if you hold me  
I could pretend for a minute

Let's fall asleep in a lie  
It's never enough but it'll get you by  
Like smoking spliffs to get high  
Like taking whiskey on ice

We got the rest of our lives to find somebody worth it  
If we only got tonight then let's stop all the searching  
Maybe it's just another kiss in the dark  
Getting us closer to the one that we want  
We got the rest of our lives and practice makes perfect

Can't even remember your name  
From your hesitant tongue and the look on your face, it's the same  
No one to hurt and there's no one to blame  
Take all I have till I run away

You touch me, I fall to the floor  
But you'll never miss me if you're looking for more

We got the rest of our lives to find that someone worth it  
If we only got tonight then let's stop all the searching  
Maybe it's just another kiss in the dark  
Getting us closer to the one that we want  
We got the rest of our lives and practice makes perfect (oh)

Tell me what you need  
If what you need is loving someone  
I may not be the one  
But I am warm and I want ya  
Oh yes I do

We got the rest of our lives to find that someone worth it  
But we only got tonight so let's stop all the searching  
I may be just another kiss in the dark  
Getting you closer to the one you want  
But we got the rest of our lives

We got the rest of our lives to find that someone worth it  
If we only got tonight then let's stop all the searching  
Maybe it's just another kiss in the dark  
Getting you closer to the one the one you want  
We got the rest of our lives and practice makes perfect  
Practice makes perfect, yes it does
