

Dial 666

Night Beats

I dialled 666 on my telephone
There's 3 hundred and thirty three ways for you to go wrong
The line went dead and smoke came through the line
Better get out, better get out while you got time

I dialled 666 on my telephone
And i heard your voice come on the radio
I needed you to do this one thing

And in a flash you came and satisfied my prayers

I tried once more and finally i got through
You're strange he said and quickly made a move
My babe slept well that night she never woke
Better get out, better get out while i can
