

Shine

Night Riots

Here in the dark with your hands in mine we go together
I've been afraid of what we'll find we go together

Shine, shine, shine on forever
Turn this night over we'll find a way

Draw in the night the future's sharpening we have each other
Like hanging ice slender frame of white we have each other

Shine, shine, shine on forever
Turn this night over we'll find a way
Shine, shine, shine on forever
Turn this night over we'll find a way

I want to love you but I've been afraid to
I would ride the ups and downs to you
I want to love you break all of my walls through
I would ride the ups and downs to you

Here in the dark with your hands in mine we go together
I'm not afraid of what we'll find we go together

Shine, shine, shine on forever
Turn this night over we'll find a way
Shine, shine, shine on forever
Turn this night over we'll find a way

I want to love you but I've been afraid to
I would ride the ups and downs to you
I want to love you break all of my walls through
I would ride the ups and downs to you
