

Young Lore

Night Riots

Night drives
All of the lonely shadows
Pass through the city
Stand up, rivals
Don't keep pushing down our dream

Out here
Where the skies are still open
I can barely breathe out
Small town, squeeze in
I can barely breathe out, breathe out

Listen now while you're young, oh
We live on a feeling
We live like we're dying
We live like we're dying
Hold on to each moment
We live on a feeling
Live now while you're young, oh
Live now while you're young
Into the great unknown
Our own law we made
Our own law we made
Into the great unknown
Our own law we made
Our own law we made

Night drives
All of the lonely shadows
Pass through the city
Stand up, rivals
Don't keeping pushing down our dream

Hold tight to each moment
We live on a feeling
We live like we're dying
We live like we're dying

Hold tight to each moment
We live on a feeling
Live now while you're young, oh
Live now while you're young

Hold tight to each moment
We live on a feeling
Live now while you're young, oh
Live now while you're young, oh!
