

Shine

Night Terrors of 1927

Sky's falling, moon's running away
Your eyes are swollen, first light of day
You don't want to be left alone tonight
True love is always subject to change
But we can take our chances
We take them anyway
I don't want to be a gambler all my life

Would you waste my days help me burn my nights
Help raise me up to the lights
Help me shine, shine help me shine, shine

It's a game of numbers, timing and luck
I never won at anything, I never gave enough
I want to know where you're going tonight

Would you waste my days, help me burn my nights
Help raise me up to the lights
Help me shine, shine, help me shine, shine
And we'll live forever and we'll never die
We will shine, shine

Will I ever sleep again?
Will I ever be anything good to anyone?
Anything that anyone wants
Will I ever sleep again?
Will I ever be anything to anyone?
Will I ever sleep again?
Will I ever be anything good to anyone?
Anything that anyone wants
Will I ever sleep again?
Will I ever be anything to anyone?

I can waste your days,
Help you burn your nights
Help raise you up to a light
Be the only thing that you get right
Help raise me to the light
And we'll me shine, shine, and we'll shine, shine
And we'll live forever and we'll never die
We will shine, shine, shine, shine
