Night Verses

I was caught underneath the gravity of the curse
In empathy, pathetic in the night stalking
Yeah, I took on another life
And, no I never wanted to steady my hate upon the earth
Where it hurt
That's when the universe lit like a match
And I don't know why

I hear my beating heart
Listen
I hear the sound of revolution
Listen
A lightning bolt has struck my soul unscathed
Into the air, into the air, into the air

Follow me we'll split in two
Follow me we'll split in two
The galaxy we'll travel

I held onto the bottom and whispered in the dirt
A parasitic creature in the mind waiting
Yeah, I was feeding on the lies
And when I never thought it would gnaw at traumatic incidents
I'm innocent and that's when my body exploded a star and shot into the sky

I feel my beating heart
Listen
I hear the sound of revolution
Listen
A lightning bolt has struck my soul unscathed
Into the air, into the air, into the air

Follow me we'll split in two
Follow me we'll split in two
The galaxy we'll travel

I was caught underneath the gravity of the curse
In empathy, pathetic in the night stalking
Yeah, I took on another life
I never wanted to steady my hate upon the earth
Where it hurt
That's when the universe lit like a match
And I don't know why

Follow me we'll split in two
Follow me we'll split in two
The galaxy we'll travel
Follow me we'll split in two
Follow me we'll split in two
The galaxy we'll travel
