

# Be With You

Nightcore

Take my hand  
We drift away  
To a place beyond the stars  
I close my eyes  
And stay to pray  
To be forever and heal my scars  
I need you here, for always stay  
Be together like it should  
From now until the end of day  
To be with you and be the best I ever could

Take my hand  
We drift away  
To a place beyond the stars  
I close my eyes  
And stay to pray  
To be forever and heal my scars  
I need you here, for always stay  
Be together like it should  
From now until the end of day  
To be with you and be the best I ever could

From now until the end of day  
To be with you and be the best I ever could

Take my hand  
We drift away  
To a place beyond the stars  
I close my eyes  
And stay to pray  
To be forever and heal my scars  
I need you here, for always stay  
Be together like it should  
From now until the end of day  
To be with you and be the best I ever could
