

Black Coffee

Nightly

It's easy with you
Breathe easy with you
It's crazy that you text me
I was just about to text you

We write the same records
Shit talk you're so clever
I love how you bite your necklace

When we're up all night
And drinking black coffee
Talking bout life
Talk about nothing
And your lipstick stains
Looks so enticing
We talk about everything
Talk about nothing
Over black coffee
Over black coffee

When we take our time
On the cellphone lights
It's all these things you do that
Drive me wild

The smell of your sweatshirt
The way that your hair looks
When it's in your face

We're up all night
Drinking black coffee
Talking bout life
Talking bout nothing
And your lipstick stains
Can you see that I'm falling
Can talk about everything
Can talk about nothing
Over black coffee
Over black coffee

We're up all night
Drinking black coffee
Talking bout life
Talking bout nothing
And your lipstick stains
Can you see that I'm falling
Can talk about everything
Can talk about nothing
Over black coffee
Over black coffee
