

## don't even think about it

Nightly

It's pathetic, there I said it  
Pick the phone up, and know I'll regret it  
It's depressing how I go back on my word  
Wreck my plans, guess I can't learn my lesson

I don't wanna talk, you just want attention  
And you say some shit like you miss me, just so I'll listen  
Wanna be alone, don't wanna fight  
And you know I can't say no  
Just like you know how much I

I freak out when you come around  
Thinking right now if you wanna call me  
Don't even think about it  
It goes south when you kiss my mouth  
Keep my guard down, don't think that I  
Don't even think about it

It's obnoxious how my subconscious  
Leaves a room in my head for you to walk in  
Try to stay out of touch, but it's a rush whenever I see you  
Try not to show it, but you know what you're putting me through

I don't wanna talk, you just want attention  
And you say some shit like you miss me, just so I'll listen  
Wanna be alone, don't wanna fight  
And you know I can't say no  
Just like you know how much I

I freak out when you come around  
Thinking right now if you wanna call me  
Don't even think about it  
It goes south when you kiss my mouth  
Keep my guard down, don't think that I  
Don't even think about it

I freak out when you come around  
Thinking right now if you wanna call me  
Don't even think about it  
It goes south when you kiss my mouth  
Keep my guard down, don't think that I  
Don't even think about it
