

the car

Nightly

(Take it back take it back
Cause I need you right now
Take it back take it back
Please don't mean it right now)

I'm passing exit 17
Trying to keep it together
But honest I don't know how

Your last words ringing in my head
Louder than 86 mph windows rolled down

I know you said it's wrong
And that it's too far gone
But god I wish you would just

Take it back take it back
Cause I need you right now
Take it back take it back
Please don't mean it right now
If there's any part of you that wants to work it all out
Say the word and I'll turn the car around

Turn the car
Turn the car
Say the word and I'll turn the car around

Call it bad luck, bad timing
But we both know
We can never say that
What we felt isn't real

Pick up your phone
Call mine I'm already
Just looking for a reason
With my hands on the wheel

I know you said it's wrong
And that it's too far gone
But god I wish you would just

Take it back take it back
Cause I need you right now
Take it back take it back
Please don't mean it right now
If there's any part of you that wants to work it all out
Say the word and I'll turn the car around

Turn the car
Turn the car
Say the word and I'll turn the car around

Turn the car
Turn the car
Say the word and I'll turn the car around

Take it back take it back

Take it back take it back
If there's any part of you that wants to work it all out
Say the word and I'll turn the car around
