

## the feeling

Nightly

When it's late at night  
And your records come on  
And you feel something down your spine  
And the room is full  
But you're staring at the door  
Is there someone that's on your mind

When you're alone and can't go to sleep  
When you get the feeling baby does it feel like me  
I wanna know if I'm who you see  
When you get the feeling baby does it feel like me

When your phone lights up  
Next to your bed  
For a second does your heart drop from your chest  
When you're lying there  
With your wandering hands  
Do you wish it was me touching you instead

When you're alone and can't go to sleep  
When you get the feeling baby does it feel like me  
I wanna know if I'm who you see  
When you get the feeling baby does it feel like me

Yeah, when you get the feeling baby

When you get the feeling, when you get the feeling  
When you get the feeling, does it feel like me  
When you get the feeling, when you get the feeling  
When you get the feeling, does it feel like me

When you're alone and can't go to sleep  
When you get the feeling baby does it feel like me  
I wanna know if I'm who you see  
When you get the feeling baby does it feel like me

When you get the feeling, when you get the feeling  
When you get the feeling, does it feel like me  
When you get the feeling, when you get the feeling  
When you get the feeling, does it feel like me  
When you get the feeling, when you get the feeling  
When you get the feeling, does it feel like me
