

First

Niki & Gabi

Dear girl, whoever you are
It's me, the one from the start
He's yours, don't care at all
He'll break you, I'll watch you fall

You're great, but I am too
This isn't shade, I'm with someone new
You didn't win, we went separate ways
But one time, I was his everything

Everything he says to you, he said to me first, first [x2]

Everything he's done to you
Everything he feels with you
Everything he has with you
He had with me
first, first [x4]

Everything he's done to you
Everything he feels with you
Everything he has with you
He had with me, first

Time's gone and so is he
I'm not the one with jealousy
I'm great I'm doing fine
Happier than I've been in my life

These are things you need to know
So you can stop your little show
First love, first fling
What you have, don't change our thing

Everything he says to you, he said to me first, first [x2]

Everything he's done to you
Everything he feels with you
Everything he has with you
He had with me
first, first [x4]

Everything he's done to you
Everything he feels with you
Everything he has with you
He had with me, first

Cause in my mind I've got these memories
I hope that you remember me
I'm sorry but I had to leave you alone in the cold
Used to call me on the cellphone when he wasn't home
And now that's in the past I'm thinking back
To what we had all the laughs never thought that this love would crash
So I checked out, packed up, and drove down
This lonely road I'm sorry but I had to let you go, yup
I got a new girl, forgot about you girl
Don't wanna throw shade but I changed my ways for you girl
Sittin, waitin, wishin for the one that I care for

The one I'd be there for, the one that could count 4, 3, 2, she's the 1
Never thought I'd be the type of guy to fall in love
But I trusted, I trust in her
And love hurts, I loved her, but I never loved you

Everything he says to you, he said to me first, first [x2]

Everything he's done to you
Everything he feels with you
Everything he has with you
He had with me
first, first [x4]

Everything he's done to you
Everything he feels with you
Everything he has with you
He had with me, first
