

# Let It Roar

Niki & Gabi

Feel the fear in the air  
But we don't take the bait  
Turn the doubts to a cloud  
And watch it float away

Fight our battles, cages rattle  
Break a wall  
Watch it fall  
Taking bruises  
Not afraid to lose it all

We got the thunder and we let it roar, we let it roar  
We light the fire and we let it roar  
We let it roar, let it roar  
You see us coming through the night  
There ain't no stopping what we ignite  
We light the fire and we let it roar  
We let it roar, let it roar

Battle eyes on the prize  
And we're all taking it  
Set the nail to the stone  
And carve out our own names

Fight our battles, cages rattle  
Break a wall  
Watch it fall  
Taking bruises  
Not afraid to lose it all

We got the thunder and we let it roar, we let it roar  
We light the fire and we let it roar  
We let it roar, let it roar  
You see us coming through the night  
There ain't no stopping what we ignite  
We light the fire and we let it roar  
We let it roar, let it roar

(Hey, hey, hey...)

We got the thunder and we let it roar, we let it roar  
We light the fire and we let it roar, we let it roar, let it roar  
You see us coming through the night  
There ain't no stopping what we ignite  
We light the fire and we let it roar  
We let it roar, let it roar
