

# Tide

NIKI

Tide is high, moon is drunk  
Vessels sailed, sailors sunk  
Waves of sound, sea of sharks  
Catch you off your guppy guard

Glossy lips, lavish lies  
Before you trust anybody think twice  
Harpoon hands warm you fast  
Hook you smooth while they pat you on the back

Tear you at the seams  
They don't ever seem to flinch  
So here on out (Here on out)  
Hold your own (Hold your own)  
Stand up tall (Stand up tall)  
Make it known (Make it known)  
You won't fall for it ever again

Never again fallin' in traps  
Swim into nets, I'll slip through the cracks  
Bring on the storm, bring on the tide  
Never back down, you'll see me rise

Always alert, always aware  
Always keep track of who's there  
Always keep track of who cares  
So many sharks here, beware

While you try to win everyone else  
You're doing it losing, you're losing yourself  
Don't get distracted, don't get compelled  
Don't let 'em capsize your health

Whether it's west, whether it's east  
Whether alone or together with fleets  
Bring on the night, bring on the tide  
Bring on the... Bring on the... Bring on the...
