

Can We Talk

Nikki Flores

Don't be discouraged in case I don't react to you
I need so much more than the physical things
if you want me on your level
Wanna go a little bit further into the deep, deep end with you

I gotta know you can handle all of me
and this can be forever
Because I lose my breath
When I think about you
I know what you got in mind
But we don't have to rush
What we do when it's worth it
It should take some time

So can we talk
So can we talk about it all night
So can we talk
So can we talk about it
I got something on my mind

Under the surface we could have so much more fun
You can be scared of a little intensity
It only makes things better
You know
I don't regret
Those things we do
I had the time of my life
But we don't have to rush
What we're doin
It's worth it
It's just by design

So can we
Oh can we talk
Baby
Can we talk about it all night
So can we talk
So can we talk about it
I got something on my mind

Mm
Can we talk about it all night
Mm baby
Talk
This is just a vibe
Oh can we talk about it
I got something on my mind

I wanted you to wrap your arms around me
I wanted to know that coming home for you
Means breathing next to me
No matter where we drift during the day
We're one again by morning
Common courtesies aside
Are you curious to know me
Do you feel the urge to come up behind me
And hold me against you because you have to

Or to make an ordinary day something different on purpose
