

Static

Nikki Flores

I've known you for forever,
and I don't wanna give up,
I know that we both feel love,
it's so so obvious.
But we can't get together,
signals always been crossed,
missing something still lost,
you think we've had enough.

I love you so much,
but it's so hard to show.
I hate that it's killing us both

The static is too much,
the static when we touch,
the static in my love is standing between us.
The static is too much
We need to clear it up,
the static in my love is standing between us.

No, I can't get close to you,
no, you can't get close to me,
so clear that we were meant to be,
if we can get through the static,

No, I can't get close to you
no, you can't get close to me,
so clear if we can get through all the static.

It's never been the right time,
we always take the high road
'Cause we're too quick to let go
We're scared to even try
the tension's always running high
I see the truth within our eyes
hiding all the love inside
and that's just why we fight

I love you so much,
but it's so hard to show.
I hate that it's killing us both.

The static is too much,
the static when we touch,
the static in my love is standing between us.
The static is too much
We need to clear it up,
the static in my love is standing between us.

No, I can't get close to you,
no, you can't get close to me,
so clear that we were meant to be,
if we can get through the static,

No, I can't get close to you
no, you can't get close to me,
so clear if we can get through all the static.

Why can't we say all the things we know
there's something wrong we can't admit it, no.
I'll wait for the day for us to finally
realize that this love won't go away.

Gotta clear up the static.
Cause a love lost is tragic.

The static is too much,
the static when we touch,
the static in our love is standing between us.
The static is too much,
We need to clear it up,
the static in our love is standing between us.

No, I can't get close to you,
no, you can't get close to me,
so clear that we were meant to be,
if we can get through the static.

No, I can't get close to you
no, you can't get close to me,
so clear if we can get through all the static.

Ohh, we need to get through all this static.
