

## Never Kissed You

Nina Sky

So you say I kissed you  
What's this talk about?  
You look sight of a million in these lights  
I don't mean to diss you  
But I'm always out  
And I meet new people every night  
I drank a lot last winter, I have no alibis  
And I don't remember who you are  
Maybe you met my sister,  
We both have the same eyes  
She's standing over there right by the bar

[Chorus:]

So slow you, roll back up  
I never kissed you babe  
Slow you, roll back up  
I never kissed you babe  
Slow you, roll back up  
I never kissed you babe

You dress just like the others  
Is that just your disguise?  
Your hat so low, I cannot see your eyes  
You're swimming in your bottom  
For ex is not your size  
And why are your ear rings bigger than mine?  
I know I didn't kissed you  
I hardly go out  
So step back with that L up in your mind

[Chorus x2:]

So slow you, roll back up  
I never kissed you babe  
Slow you, roll back up  
I never kissed you babe  
Slow you, roll back up  
I never kissed you babe
