

Counting Stars

Nina

Let's run away, we'll walk by the river side
I never meant to lie, but the stakes were high
Counting stars all night, counting stars til it's bright
I don't care where we are if you're by my side

I can still feel your pain
I can still hear you say

You and I will pass the test of time
Leaves and wolves, the waters and the sky
Inside, forever wondering why
Set in stone, a mission on our own

Frozen the morning found us holding hands
East to the sea, our love won't just drown
Under the red moon we did seal the pact
We'll be gone so soon, there is no way back

I can still feel your pain
I can still hear you say

You and I will pass the test of time
Leaves and wolves, the waters and the sky
Inside, forever wondering why
Set in stone, a mission on our own
A mission on our own
A mission on our own

(You and I will pass the test of time)
(You and I will pass the test of time)
I don't care where we are if you're by my side

You and I will pass the test of time
Leaves and wolves, the waters and the sky
Inside, forever wondering why
Set in stone, a mission on our own

(You and I) will pass the test of time
Leaves and wolves, the waters and the sky
Inside, forever wondering why
Set in stone, a mission on our own
(You and I) a mission on our own
(Set in stone) a mission on our own
(You and I) a mission on our own
(Set in stone) a mission on our own□
