

There's something growing inside  
It's pushing out of my mind  
A simple thought taking over every part of me  
What if our days run short?  
Time is so hard to ignore  
When waiting for the sound

I'm as ready for  
The journey now  
As I'll ever be  
I've been waiting for  
My love to come  
And rescue me

Let's get carried away  
And find ourselves where we want to be  
Let's get carried away  
And find our way to the galaxy  
Follow the mystery

My heart is pounding inside  
There's not a day I'd rewind  
Though trouble came it made a way for me to be with you  
And now my days run short  
I've let my time run its course  
Been waiting for the sound

I'm as ready for  
The journey now  
As I'll ever be  
I've been waiting for  
My love to come  
And rescue me

Let's get carried away  
And find ourselves where we want to be  
Let's get carried away  
And find our way to the galaxy  
Follow the mystery

My heart felt the melody  
And it's pulsing inside of me  
When the day's done with gravity  
I will join you in the galaxy  
I will join you in the galaxy  
I will join you in the galaxy

Let's get carried away  
And find ourselves where we want to be  
Let's get carried away  
And find our way to the galaxy  
Follow the mystery

Let's get carried away  
And find ourselves where we want to be  
Let's get carried away  
And find our way to the galaxy

Follow the mystery
