

The Light

Nits

I had no reason to be so afraid
No, I had no reason to be so afraid
To be so afraid

And I came to the mountain
And the sun went down
And I came to the mountain
And the sun went down
There was something in the air
There was a hole in the ground
An old man went in
And a little child came out

Your light will shine
Will shine
Will shine

And I came to the house
At the other side of the town
I came to this house
At the other side of the town
And the sun was pouring down
Like honey on the ground
And an old man went in
And a little child came out

Your light will shine
Will shine
Will shine
Your light will shine
Will shine
Will shine

I came to a room
At the backside of this house
There was something in the air
And the wind blew through this house
And I saw my father standing
Near the window with a light
He was looking at the darkness
Of his never changing night

And your light will shine
Will shine
Will shine
Your light will shine
Will shine
Will shine
