

Never Enough

Niykee Heaton

You've become everything that I love
And it makes me fall apart, fall apart every time
You are one, I found in a million
And I can't begin to start, believe in my heart that you're mine

And even behind your faults
I find you even more, even more beautiful
And I just can't get enough

Darling you belong with me
And I hope you'll always be my love
It's never enough
It's never enough

All my life, I see it in your eyes
And I don't know how you do
But the way you move makes me fly
I went blind, searching for all this time
But darling I found your hand
And now I can see the lights

And even behind your faults
I find you even more, even more beautiful
And I just can't get enough

Darling you belong with me
And I hope you'll always be my love
It's never enough

Darling you belong with me
And I know you'll always be my love
Forget is never enough
It's never enough

Forever is never enough
