

# Explore You

NJOMZA

Yeah...

You tell me that you wanna go  
'Cause I don't think I can make it without you here  
(Oh no, no, no)  
Time is moving so slow  
Some rass just said I want you near  
Smoking the medicinal till we feel invincible  
Got no problems, got no fears  
Your love is so damn critical  
Mentally and physical  
Screaming just so you can hear

How much I adore you  
I want to explore you  
Want our souls to collide  
With our bodies, free and wild  
Baby let me show you  
Just want I can do  
I can teach you to fly  
No more pain and no more cries

I believe that I see heaven in your eyes  
I found a sense of peace  
I think I, I think I, I think I found paradise  
Could this be what they call "love"  
In a world of sin, we can rise above  
You're all that I want to be apart of  
I'm a fiend for it, I can't get enough  
Every inch and every touch  
Can't put it in words just how much  
Oh I, oh I, oh I want you all the time  
You got me, you got me, you got me so damn hypnotized

How much I adore you  
I want to explore you  
Want our souls to collide  
With our bodies, free and wild  
Baby let me show you  
Just want I can do  
I can teach you to fly  
No more pain and no more cries

Oh...  
Oh I, oh I, oh I  
Oh I, oh I, oh I...

Let me hear that

So much trouble in the word  
So much trouble in the word  
So much trouble in the word  
So much trouble in the word  
So much trouble in the word  
So much trouble in the word
