

First off let me introduce myself  
I might let you down  
I want you around  
I never felt nobody else  
With a vibe like you  
I need something new

Let me introduce myself  
I fall too quick  
I shoot I miss  
I start I quit  
Need endless bliss  
But I know I'm gon' make the best of this

Cuz if it feels right  
Then we can stop the world and we can take it slow  
Feels right  
I'll make it even better than it was before  
Feels right  
We don't have to let anybody know  
I wanna be the one that gets to take you home  
Give you all the things that you've been searching for

Don't shut your eyes  
Open wide  
And you'll see  
You don't need nothing when you're here with me

So when you introduce yourself  
There's no holding back tell me what's inside of your head  
Tell me everything you regret  
Before you forget make sure that you introduce yourself  
A proper roll out then we can roll out someone to hold down  
I need the most so I keep you close  
All these things I know now

Cuz if it feels right  
Then we can stop the world and we can take it slow  
Feels right  
I'll make it even better than it was before  
Feels right  
We don't have to let anybody know  
I wanna be the one that gets to take you home  
Give you all the things that you've been searching for

Don't shut your eyes  
Open wide  
And you'll see  
You don't need nothing when you're here with me
