

I was lying in my bed
All the face(s) I thought I saw
They were standing over me, and
Then I knew for sure
That they were there for me
And I wasn't wrong

Don't you wanna go
Down to the bitter light?
All the faces disappear
And then you know

Hurts so much
On the way down
I feel every branch and thorn for all of time

Don't you wanna face
Where other people go?
All of time we've gone and gone
We can't say no

On the brighter side
It's so quiet now
All the thoughts I thought were mine have gone goodbye

Don't you wanna go
Down to the bitter light?
All the faces disappear
And then you know

I was lying in my bed
All the face(s) I thought I saw
They were standing over me, and
Then I knew for sure

Don't you wanna face
Where other people go?
All of time we've gone and gone
We can't say no

Don't you wanna go
Down to the bitter light?
All the faces disappear
And then you know

Don't you wanna face
Where other people go?
All the time we've gone and gone
We can't say no

Down to you and me
We're all going home
