

# Start The Fire

No Doubt

C'mon baby get the lighter  
We're gonna start the fire

The army of words is in me  
Silent the soldier weeps  
Lying here back to back  
Waiting for you to be react

Sometimes all I need is a good push  
Roll over and whisper some goodness  
Go on baby you be the hero  
Now can we go back to zero

[Chorus:]  
Go on and get the lighter  
We're gonna need some fire  
Let's get a little higher  
The battlefield is tired  
Nevermind all that?  
Go on baby and get the lighter  
We're gonna start the fire

Just come here and cuddle up  
I feel a little rough  
I missed you in my sleep  
Are you still mad at me?

The moon must have mended my bad mood  
Come kiss me the way you meant to  
Last night I was just playing  
Let's put it all away and

[Repeat chorus]

Go on baby and get the lighter  
We're gonna start the fire  
Go on baby and get the lighter  
We're gonna start the fire

Climb in and love me  
Climb in and love me  
Go on now baby you get it

Had quite a heavy night  
So delicate our love and pride  
The most stubborn girl around  
You really know how to bring me down  
One more famous night to remember  
Let's laugh at my silly temper  
Now let's burn the morning sweetly  
Get over here and complete me

[Repeat chorus]

Go on now baby you get it
