

Every Single Screen

No Fun At All

Clear my head, turning off the supplier
Feed my soul, that is all I require

Oh no, there's another clown that really takes me down
Oh no, there's another act that really makes my mind go blank

Alright

Read my lips, take away my desire
Make it right, fade away and expire

Oh no, there's another clown that really takes me down
Oh no, there's another act that really taints my mind (my mind)

Every single screen will feed me
I can't believe all the drivel that I get
Every single screen will feed me
Thank God it's easy to forget

Every single screen will feed me
I can't believe all the drivel that I get
Every single screen will feed me
Thank God it's easy to forget

I've had enough of this madness
I've had enough of this madness
All this stupidity coming through
I've had enough of this madness
I've had enough of this madness
I know there's not much we can do

Alright
Alright
(Enough of this madness)
Alright
(Enough, enough)
Alright
