

We devastate  
It's time to open up the flood gates

The poison, the cure  
It's in the food  
The food we consume  
The lives we consume

We are the monsters you seek  
We are the secret  
We are the monsters you seek  
Nurture the secret  
Hide our existence

Livestock. Living stock. Living resources.

The signals of misery  
The extinction of families

You look at them  
Money is all you see

I see families  
I see the tragedy  
I see the slaughtering  
The fucking harbouring  
All these horrible things  
All these horrible things  
All these horrible things  
These fucking horrible things

One day you will finally see  
All the things that you have caused to rot  
You will cry yourself to sleep  
As the guilt is slowly breaking you  
You will cry yourself to sleep  
When you realise what you have done  
You will cry yourself to sleep  
As the cancer slowly takes you

You slaughter them all  
We are the monsters you seek  
You slaughter our world  
We are the monsters you seek
