NoCap

Word on the place, shawty heard I was feelin'
She want to feel not fake, but most likely, I knew what I would change
My champion, who knew the code to the safe be the same one of my secrets
Spark up blunt, over my lil' homie Greg, we steady be pourin' and sippin'

I should'a listened to my rider and passed it to my teammate
And my love be in the lost and found, if you find it, just keep it
Big shotgun slugs, we sling 'em 'round from the west to the east end
Like fuck a thug, let's leave the town, do the dash on the freeway
You ain't hold it down when I needed love from ya
I know lil' shawty reminiscin' 'bout the times she know I kept it a hundred
My heart don't agree with my mind, so from your love, I'm still runnin'
Who had my back just like my spine when I be down on my luck?
How you quit to tell 'em what I'm 'bout and what I taught you and told you?
Told him, "Pick a side," you chose that boy
So when we catch him, tenfold him
Plenty criticize, I accept the fact
No more of my love, I won't show 'em
Never visualized knives in my back from the ones who I call my soldiers
Heart gettin' colder
Dealin' the fuck out the room on the motherfucker jet
Pop out the motor
And appreciate what you got, 'cause what you had, you got way more of
Couple thousand for a pound, exotic grass, Luwop gon' roll up
Who wanna [?]

Let's fly away, and never land
With the number one woman in my life
I just want the chance to say for once, yeah, I done won in my life
Love and romance
My champion, the same woman as my wife
Show me a way
Baguette-y clusters flood the one that she like
Let's fly away, and never land
With the number one woman in my life
I just want the chance to say for once, yeah, I done won in my life
Love and romance
My champion, the same woman as my wife
Show me a way
Baguette-y clusters flood the one that she like

Girl, if you my shirt then a nigga got you tucked in
In and out of Nieman's, they gon' think a nigga Blood then
I tryna clean the whole world for you with Lysol
Glow in the dark, I can still see you with lights off
No Halloween, but if scared, I buy you boo-guettes
Came from apartments, nigga made it out the complex
She know these chances slim, but it's cool, she know that I'm a soldier
Maybe I just buy her Ferragamo on this rollercoaster
Don't forget, girl it's on us, yeah
Soon to hate, then I try to find love
Always seem small when it's beef
Soft to you but I'm hard to the streets
Yeah, we was just fuckin', it wasn't supposed to be nothing
But when I dived in, you left your heart in the sheets
Let's go half on a baby, I won't hold back
My last bitch, she from Atlanta, she a old nat

Give you my real, not my alias
Girl, come jump up in this spaceship

Let's fly away, and never land
With the number one woman in my life
I just want the chance to say for once, yeah, I done won in my life
Love and romance
My champion, the same woman as my wife
Show me a way
Baguette-y clusters flood the one that she like
Let's fly away, and never land
