

## Jump Right in 2.0

NoMBe

When I stare into your eyes  
I see the world that's behind  
In commotion, in commotion  
And it's just about time to  
Follow that worry line to the coast and into the ocean (hopin')  
I know you've been restless  
Clingin' onto stress, but drown it in the bliss I bring  
Trouble and your red dress  
Leave it at the doorstep  
Don't worry about a single thing...

Just jump right in  
Just jump right in  
Just jump right in  
And leave some room for me if you can  
Just jump right in  
Just jump right in  
Just jump right in  
And leave some room for me if you can

Don't you worry bout a thing  
'Cause you know I'll keep you safe  
Like an oyster, like an oyster  
Every boy in the world knows  
The prize is a pearl  
If you hoist her, from the moisture  
Boy, 'cause  
I know what you came for  
Baby let that rain pour  
We can take our love upstream  
Floating like a light heart  
I could be your lifeguard  
Come on babe and jump right in

Just jump right in  
Just jump right in  
Just jump right in  
And leave some room for me if you can  
Just jump right in  
Just jump right in  
Just jump right in  
And leave some room for me if you can

Is there something in the water?  
That keeps you holding out on me?  
If so I'll promise to give proper  
Mouth-to-mouth if you can't breathe

Just jump right in  
Just jump right in  
Just jump right in  
And leave some room for me if you can
