

Jump Right In

NoMBe

When I stare into your eyes
See the world that's behind the commotion
Hey commotion
And it's just about time to follow the worried line
To the coast and into the ocean, hoping

I know you've been restless
Clinging onto stress but
Drowning in the bliss I bring
You're troubling your red dress
Leave it at the doorstep
Don't worry 'bout a single thing

Just jump right in
Just jump right in
Just jump right in
And leave some room for me if you can

Don't you worry 'bout a thing
'Cause you know I keep you safe
Like an oyster, like an oyster
Every boy in the world knows the prize is a pearl
If you hoist her from the moisture

Boy, 'cause I know what you came for
Baby, let that rain pour
We can take our love upstream
Through rain floating like a light heart
I could be your lifeguard
C'mon baby, jump right in

Just jump right in
Just jump right in
Just jump right in
And leave some room for me if you can

Is there something in the water
That keeps you holding out on me?
So I promise to give proper
Mouth-to-mouth if you can't breathe

Just jump right in
Just jump right in
Just jump right in
And leave some room for me if you can
