

Marco Polo

NoMBe

All alone on an island
Waiting for signs of life from the mainland
Saw your face and I knew
You'd help me escape my feelings at hand

I met you in LA
You told me your real name
I said I like your music
And you came into my space

Heartbreak on the way
No money to my name
But if you wanna hide out
Then I know the perfect place

Private jet to a spot in the tropics
You and me no clothes hottest topic
Now my brain filled with thoughts no stopping
No stopping no stopping

All alone on an island
Waiting for signs of life from the mainland
Saw your face and I knew
You'd help me escape my feelings at hand

Say my name like Marco Polo (polo!)
Got my body going loco (loco!)
Should we stay or should we go go? (go go!)
Never try we'll never know

Baby don't be late
A fantasy awaits
Patience is a virtue
But girl don't you make me wait
Planning to escape
No money to our names
But if you wanna hide out
Then I know the perfect place

Private jet to a spot in the tropics
You and me no clothes hottest topic
Now my brain filled with thoughts no stopping
No stopping no stopping

All alone on an island
Waiting for signs of life from the mainland
Saw your face and I knew
You'd help me escape my feelings at hand

Say my name like Marco Polo (polo!)
Got my body going loco (loco!)
Should we stay or should we go go? (go go!)
Never try we'll never know
