

Sand In My 3rd Eye

NoMBe

Get your feet back on the floor
Here comes that shit you can't ignore
Drink plenty water get your rest
Let your mind wander just relax

Simply rise and shine

Behold!
The sound of the vibration in your bones
The body that awakens to the soul
I still have sand in my
Third eye that's wider than before
But still I recognize
All the divine that lies below

Try some love and tenderness
Some extra self care for dat ass
Cause life it short and that's a fact
No need to save the best for last

Leave your strife behind

Behold!
The sound of the vibration in your bones
The body that awakens to the soul
I still have sand in my
Third eye that's wider than before
But still I recognize
All the divine that lies below
