

# To The Moon

NoMBe

3035 somewhere in the milky way

Just stopped to change the world, get gas and company  
No lie I'm sure you heard it's lonely out in space  
So take your chance in zero gravity with me

Ooooh-ooh-ooh, maybe we could switch  
Ooh-ooh-off... steering my rocket ship  
Ooh-oh-oh as I burn through all my fuel  
At speed of light with you

Let me take you to the moon baby baby  
I got a table there for two baby baby  
Less you got better shit to do this evening  
Don't keep me waiting  
And depending how I feel  
I might letchu take the wheel (uh)

Ooooh baby baby  
Ooh baby baby

Ooooh baby baby  
Ooh baby baby

Two-hundred-forty-thousand miles and we're already late  
Not long till space invaders put flags in the golden state  
Severe mind control might turn us into slaves  
Behold the overlord might spoil our great escape baby baby

Oh oh oh, baby I'm down to switch switch  
... steering my rocket ship  
Ooh oh oh as I burn through all my fuel  
At speed of light with you

Let me take you to the moon baby baby  
I got a table there for two baby baby  
Less you got better shit to do this evening  
Don't keep me waiting

And depending how I feel  
I might letchu take the wheel (uh)

Let me take you to the moon baby baby  
I got a table there for two baby baby  
Less you got better shit to do this evening  
Don't keep me waiting  
And depending how I feel  
I might letchu take the wheel (uh)

Ooooh baby baby  
Ooh baby baby

Ooooh baby baby  
Ooh baby baby
