

# Wait

NoMBe

I won't wait this time  
No, not now, not again  
Not much longer  
Heavy weight works my  
Mind all night it's so hard  
Not to ponder

Let's make it last forever  
'Cause the night's still young  
It's true, I feel the pressure  
Every time you're gone  
As long as we're together  
This moment lasts forever

And what will she say  
Would my heart be torn?  
Maybe the same helps to keep her warm  
Maybe she's too shy to comment  
Twenty one and too hard to call it

Let's make it last forever  
'Cause the night's still young  
It's true, I feel the pressure  
Every time you're gone  
As long as we're together  
This moment lasts forever

Let's make it last forever  
'Cause the night's still young  
It's true, I feel the pressure  
Every time you're gone  
As long as we're together  
This moment lasts forever
